

Parts of a plant

You know that plants are

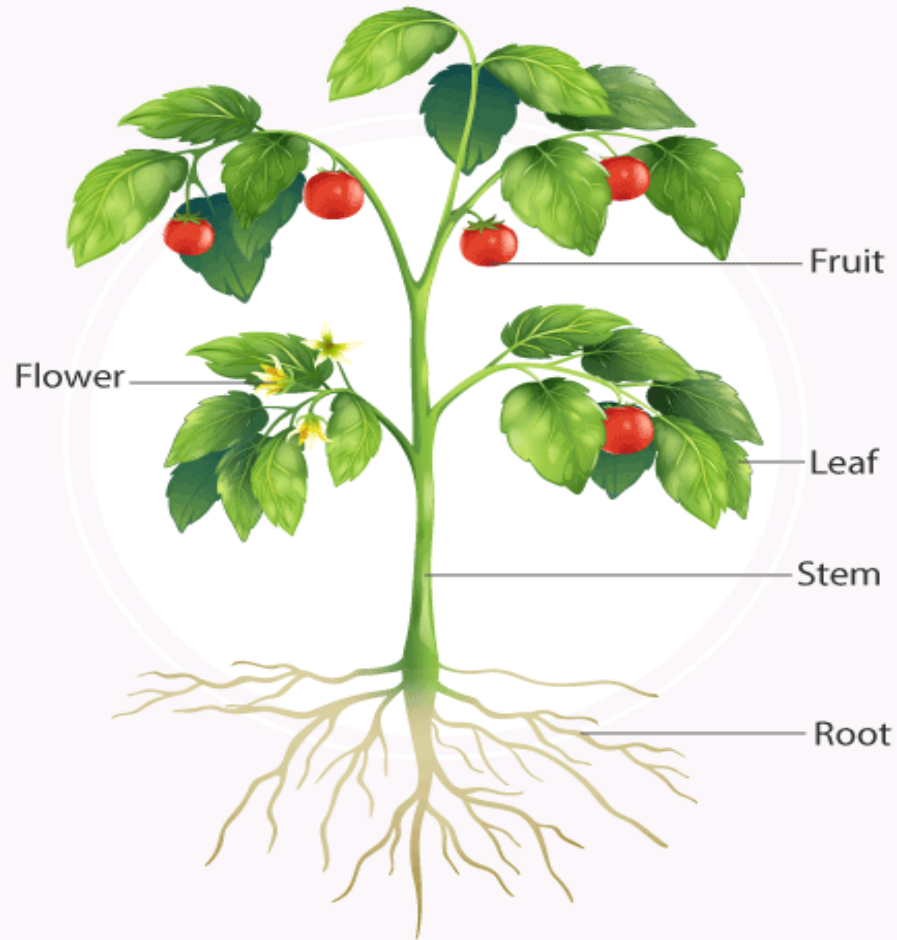

living

Plants are all around us.

Some plants are tall and some are small.

All plants have **parts** that we can see.

Plants and light

- Where do you see plants ?
- Do you have plants at home ?
- Where do you keep plants at home ?

What do you think
plants need to grow ?

Do plants need
food and water
like people ?

Q. why is this plant bent ?

-Because it is growing towards the light.

Plants can't grow in the cave.
-Because there is no light.

Plants need water

- You may have seen plants growing in places like this.

- Some plants live near water.

- Some plants live in water.

- Some plants live in dry places

- Where do plants get water from?

If plants do not have enough water they die.

If plants have too much water they die.

What a Plant Needs
