

Pushes and pulls around us

Pushes and pulls are **forces**

PUSH

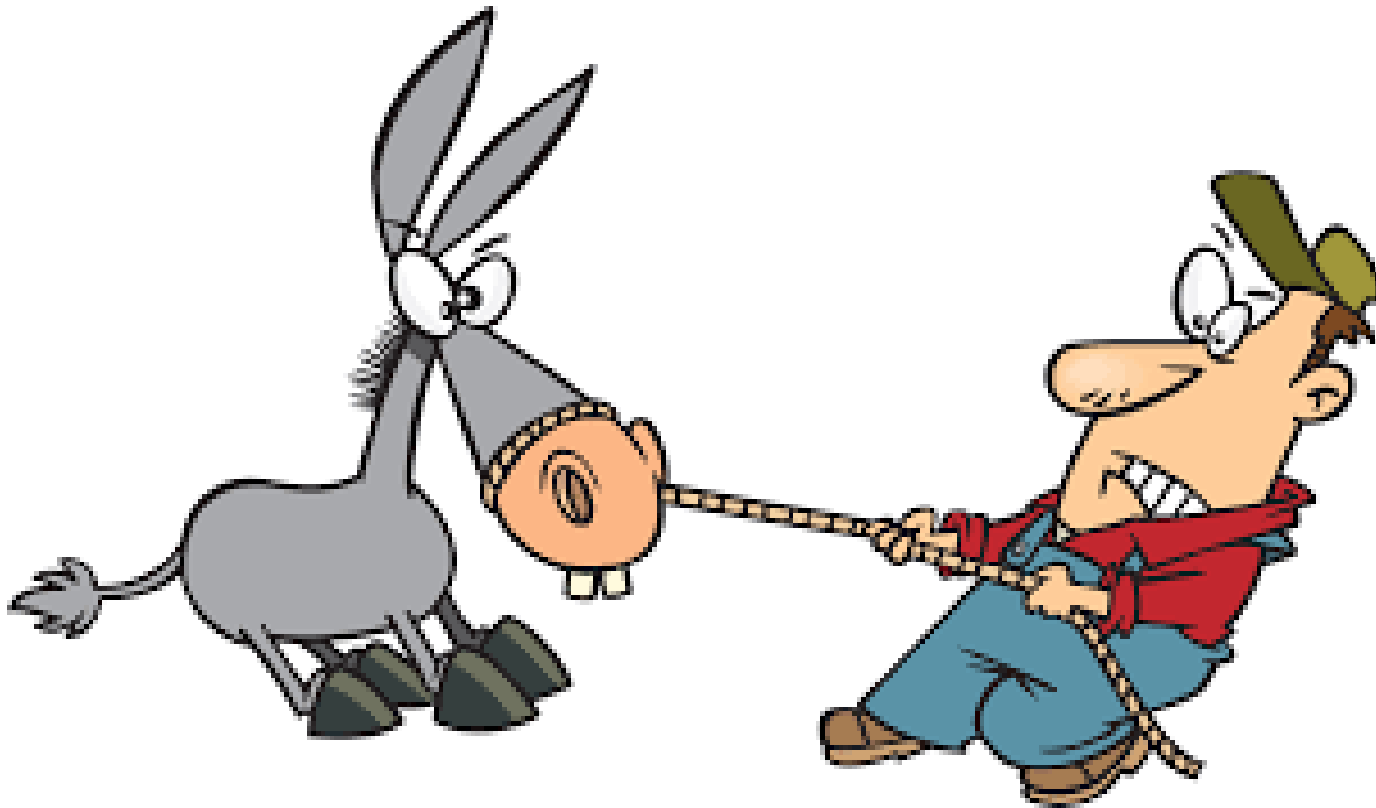

PULL

A push is a force **away** from you.

A pull is a force **towards** you.

We have to push and pull to make things move and stop.

Some things need **big push**

Some things need **big pull**.

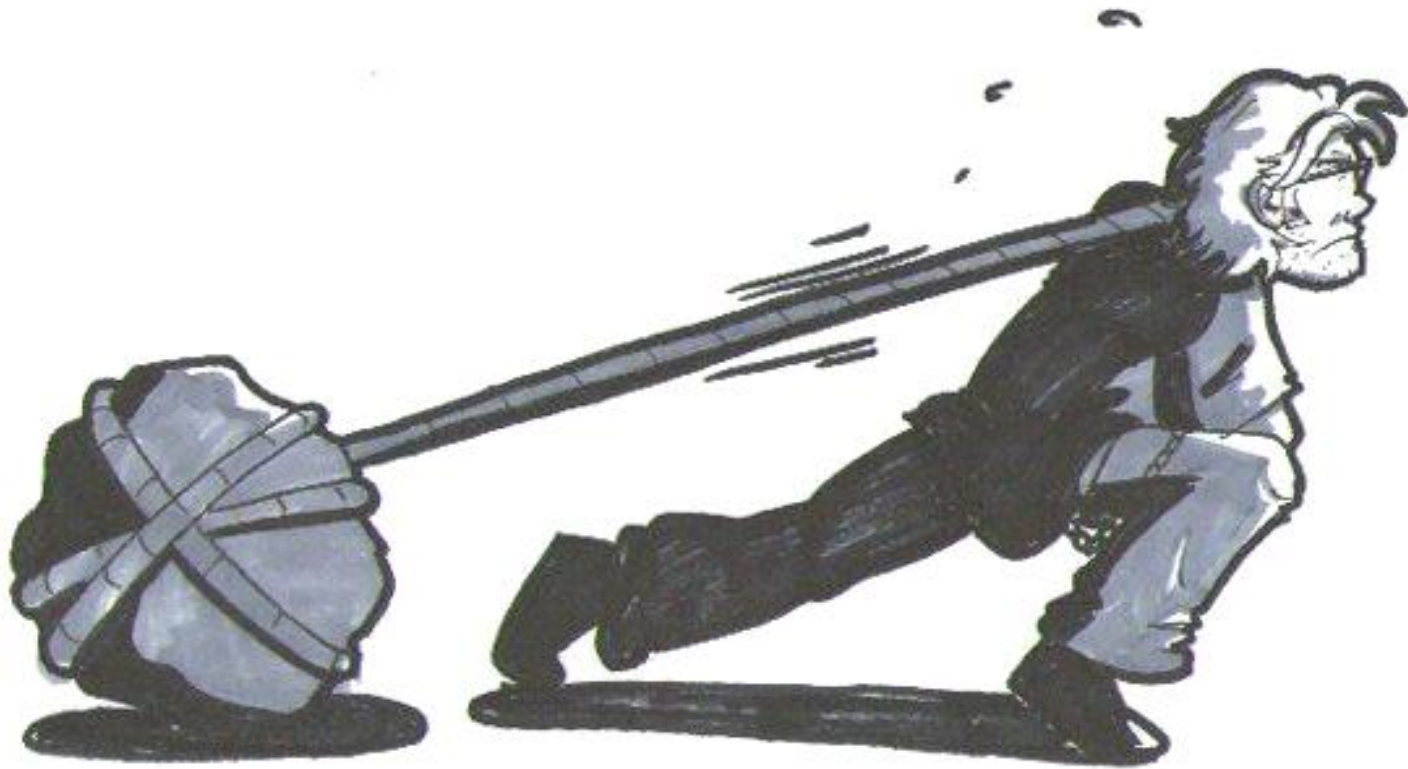

Which toy needs a big pull to make it move?

The toy horse needs a big pull to make it move.

Which toy needs a small pull to make it move?

**The toy car needs a small pull to •
make it move.**

This man is pulling a big rock.

Do you think the rock will move?

The rock will not move. The man cannot pull it with a big enough force.
